Insurance commissioner,

This is a ridiculous scam.

Washingtonians are injured in car accidents in numerous numbers daily, some even killed. Most of these accidents are caused by people breaking the law. Most of these people breaking the laws are repeat habitual offenders who dont care if they hurt someone or not. We dont enforce our laws strictly enough which has created a culture of disobedience and negligence. Over 75% of car accident victims I treat were hit by someone who didn't have insurance and the at fault driver was driving recklessly because there is little to no recourse for damages they were responsible for.

Now you want to limit how much medical attention these patients can seek!?!?? The state minimums for PIP are drastically too low as it is. Most of my patients end up with permanant injuries or disabilities due to negligent drivers and now you want to decrease these people's ability to get help!?!? All you will be doing is creating more drug addicts due to chronic pain.

The idea of limiting conservative none drug related treatments for people in pain is despicable and without any honor. If you really cared about your voting public you would increase state minimums for medical treatment and increase punishments for reckless driving, and no insurance.

Sincerely

Dr. Christopher Pirone, business owner, practicing doctor, former Marine.
