We pay hundreds of dollars to be fairly covered by our insurance, specifically our collision PIP insurance. To not give patients the money to meet their needs when in a collision is a short cited policy. As a chiropractor, I know that it takes months of care even for the smallest of collisions. This is not because it is unnecessary but is indicative to the injury processes of the body. Most people are not able to just sit at home and rest therefore they receive care to speed recovery and prevent future problems from arising that will take more time and more care in the long run. Please help us protect our patient by returning your promise to provide sufficient resources necessary for their health and well-being after experiencing an auto collision. After all, we are paying handsomely for the service (PIP is mandatory in some states) and Healthcare providers deserve to get paid for providing optimal care to their patients that need it

In honor of healing and in sacred gratitude of those that tend the lands, our office is situated on land that was stolen from the Duwamish\Coast Salish people. I hope that with this acknowledgement, we find ways to reconcile and help them reclaim the land that is there's.
