I'm writing in regards to the Fair Health Database and should be repealed

this secretive database is unlawfully reducing our bills 20% leading to

- Auto Insurers are using FAIR Health database to undercut necessary treatments, and nobody knows how it works
- Patients and providers are being left with the financial burden
- Need full transparency on FAIR Health database
- Unfair that provider's treatment bills are arbitrarily cut with no real justification based on a patient's health care needs
- Cook-book medicine should not be used as "one size fits all"
- Patients pay premiums for auto insurance and expect the benefits for what they paid for
- If you have specific examples to share of how this practice has impacted your practice and your patients, share those details!
- If my bills are cut to 80%, then it will lead to additional health care costs to make up the difference

thank you for your time and matter since a majority of our accident patients are not happy with this financial burden during these times.

Dr. John Huynh
