Subject: Fair payment for Chiropractic services

External Email

Lingering effects of long term discrimination against Drs of Chiropractic are still affecting reimbursement for our valuable services. For instance the American Medical Association was twice found guilty of trying to contain and eliminate the Chiropractic profession a more effective competitor, under the guise of protecting the public and they engaged in "long-term systematic and criminal wrongdoing and the effects will be felt for generations"

Wilk vs. AMA

Insurance companies are cutting our fees arbitrarily and maliciously without any recourse and this cannot be allowed to continue.

Chiropractic Drs are well educated and have great expertise in spinal health and neurology. We also have relatively high overheads and our fees have not been keeping up with inflation for many years. Please consider these factors in your decision making process. Thank you
