External Email

Dear Insurance Commissioner Kuderer,

I am very concerned about the use of an external pricing system that will dictate the reimbursement of our services with relation to treating our patients that have sustained injuries in motor vehicle collisions, many of those through no fault of their own. The use of the FAIR Health database to undercut our treatments (which are necessary, reasonable and 100% attributed to the accident) should not be allowed.

Allowing these insurance carriers to reduce the amount of reimbursement arbitrarily will put even more hardship on small indempent businesses that have already been struggling due to the stagnation of reimbursement levels over the past two decades. The providers and the patients should not be the bearers of the financial burden due these unnecessary and misguided reductions.

Thank you for your support in this matter.

Dr. Nicholas Wolf
