Good Day. I am Dr Raymond Bedlington, a chiropractor in Whatcom County.

I am disappointed that there is even a discussion of reducing fees for our services. Ultimately my patients will be required to pay more for their services, services that they pay a premium to the insurance company for, and expect to receive. The insurance companies will arbitrarily cut costs with out providing a reason, based on a one size fits all that they are not willing to provide the reasons for. As it is I personally provide more services that I could charge for but don't on each treatment, if reimbursements for services are reduced, I may consider moving to a cash practice only, a real disservice for my patients as I am the only doctor in the city I practice in. Please do not allow this arbitrary reduction of service to happen in this state.

Dr Raymond Bedlington
